# *for the savings!*

*WABCO IVTM: The sooner you retrofit your truck-trailer-combination, the sooner you can begin to save more than £400 a year.\**

With WABCO's tyre pressure monitoring system IVTM for trucks and trailers, you can instantly see when tyres begin to run low on air.

## Significant savings

Retrofitting your truck or trailer with IVTM is an investment that quickly pays for itself.

It can save money and reduce operating costs by more than £400 a year per truck-trailer-combination!\*

## IVTM design features

- Touch-of-a-button tyre pressure control
- Tyre pressure transmission from trailer to tractor by radio
- Easy retrofit mounting
- Streamlined antenna-free design
- No re-configuration needed after wheel or tyre exchange

## IVTM benefits

- Higher safety and mobility
- Reduced tyre damage lowers maintenance and accident costs
- Lower fuel costs from decreased road resistance
- Longer tyre life due to less tread flexing

\*Truck-trailer-unit saves £400 per year: Calculation for 12-wheel semi-trailer unit with an annual operating distance of 75,000 miles. Estimated average pressure is 7 instead of 8 bar on all tyres. Fuel consumption is 8,83 mpg (32 l/100 km). Price per gallon: £3.85. Tyre performance is 125,000 miles (price per tyre £175).

WABCO IVTM display update: Easy air pressure control for each tyre at the push of a button.

Now there is an IVTM system especially designed for easy retrofit in commercial vehicles: the reliable tyre pressure monitoring system IVTM from technology leader WABCO.

- WABCO IVTM uses radio frequency transmissions to report in real time every deviation from the desired tyre pressure. It reports reliably and independently for each tyre. Even when the vehicle stops.
- WABCO IVTM eliminates inconvenient and expensive manual controls.
- WABCO IVTM helps you maintain air pressure at an optimum level. The resulting reduced road resistance cuts fuel costs. Another plus: reduced tread flexing increases the tyre service lifetime.
- Your payoff with WABCO IVTM: More than £400 per year and per truck-trailer-combination.

**IVTM pays! Avoiding just one incident of tyre damage or replacement pays for the IVTM system. So get IVTM on board now. Retrofitting is easy, anytime. Contact your WABCO partner for more information today!**
